

SoGEA

Product Sheet

SoGEA is the future of Ethernet in your School, Business or Home. SoGEA (Single Order Generic Ethernet Access) allows you to get a superfast Internet connection at an attractive price. SoGEA saves you money as you don't need a fixed phone line to run your broadband connectivity over. Say Hello to a cheaper, faster and superior broadband connection.

Hello SoGEA - Goodbye ISDN Phone Lines

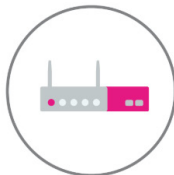

SoGEA is the biggest change in the telecoms industry for over 30 years. Historically, connectivity needed to run over traditional phone lines. Traditional phone line services are being switched off in 2025. This means that connectivity will no longer be supported by copper telephone lines. The future is data only, Single Order broadband such as SoGEA, or Single Order Generic Ethernet Access.

Big Benefits, Small Price

SoGEA is packed full of benefits that you can't get with standard broadband packages. SoGEA faults are resolved much quicker since customers only need to provide one support call to their SoGEA provider. SoGEA also enables for easier remote working solutions in your business, school or home.

FAQ's

Why the change to SoGEA?

SoGEA was created as Open-reach decided to shut down the traditional phone network by 2025. This means that broadband services that run over a landline will no longer work.

How do I make calls after the ISDN shut down?

Customers will have to move to voice services such as VoIP to make calls before 2025. Customers can then add SoGEA broadband onto their VoIP service.

How long does SoGEA take to install?

Ordering a SoGEA service is quick, SoGEA can be installed within 5 days.
