

Hello Telecom offers a number of traditional telecoms services, to include Analogue line, ISDN2 and ISDN30, from high quality tier 1 suppliers. Our Calls & Lines can save your customers money, whilst improving line quality and efficiency within their business.

Improved User Experience

Using only tier 1 networks allows us to offer telephone lines that provide a solution of the highest quality. Lines are supported by Hello Telecom's team to ensure the best possible user experience. As a smaller, more focused organisation than the larger suppliers, Hello Telecom can provide far better service levels with our dedicated technical support team.

WLR3 Portal

Wholesale Line Rental (WLR3) enables resellers to offer their own brand telephony service on our network. While we provide and maintain the lines, the WLR3 Portal gives the ability to manage your own installations and faults.

Competitively priced calls
High quality tier 1 networks
Full A-Z of destinations
Full number options
Number portability
Itemised billing
